Application Form

Welcome from the Headteacher

Hedingham School and Sixth Form has a richly deserved reputation for achievement and excellence. We offer a challenging and stimulating learning environment where students are actively encouraged to 'think' and explore strategies to grasp and apply knowledge.

Students are prepared for life in the 21st century through a safe, caring and supportive environment. The Sixth Form is an integral part of school life and students make an active contribution to the whole school.

We work together to foster positive relationships with students and staff, offering mutual respect for all members of the school community.

Hedingham Sixth Form offers a wide range of courses, providing students with the opportunity to follow appropriate and relevant pathways. Alongside this, we ensure that students are supported through a comprehensive personal development programme.

Sixth Form students are encouraged to take on leadership roles and participate in the enrichment opportunities available. This allows them to develop the skills and qualities required to meet the challenges of future life.

As a member of Hedingham Sixth Form you can expect:

Excellent teaching, advice and guidance from your subject teachers and tutors

A challenging curriculum which provides a range of courses to meet your needs and abilities

A commitment to your welfare and success through personal mentoring and target setting

The best opportunity to pursue your chosen career pathway at university, college or in employment

I look forward to working with you to achieve success at Hedingham Sixth Form.

**Andrew Harvison
Headteacher**

Welcome from the Head of Sixth Form

help our students grow academically and also as people. We offer a range of subjects that cater for the differing needs of each student including the traditional A Levels as well as the more vocational based BTECs and Cambridge Technicals. We also offer a wide variety of enrichment subjects that most of our Year 12 students opt into.

Additionally, we have just introduced a T-Level qualification with further plans to expand this provision.

We take great pride in ensuring that all of our students have the support to pursue the next stage of their education or careers. About 50% of our students will go on to study at University, many of which are at Russell Group Universities as well as Oxbridge. Our students go on to study a wide range of degrees including Art, Medicine, Law and Film Production. A key part of coming to Hedingham is the support that we offer students with the UCAS process of applying to University. Your personal tutor will be with you at

each stage of the process to help make sure that your application is as strong as possible.

For those students who opt to go down the apprenticeship route, you will be supported in searching for the right apprenticeship in writing an excellent CV and application letter as well as interview techniques. Students from Hedingham go on to apprenticeships in a range of different fields including Accounting, Design, Engineering and with the Armed Forces.

Outside of the classroom Hedingham students play an active role within the school and wider community. Sixth Form students work as mentors for students in the lower school, helping to support them with aspects of school that they struggle with. You will have the opportunity to tutor GCSE students and to help younger students with their reading. We have an active Sixth Form Council which runs and organises events throughout the year helping to raise thousands of pounds for local charities.

Sixth Form is the most exciting yet challenging time of a student's educational life and at Hedingham we pride ourselves on supporting each student through this stage of their education.

Rory Hyde
Head of Sixth Form

Where do you want to be in two years' time?

At Hedingham Sixth Form the student is at the heart of everything that we do. Our core purpose is to help guide them as they prepare for their exams and to help them make decisions about their futures.

We pride ourselves on the opportunities both inside and outside of the classroom that

USA Conflict at Home

WASHINGTON PEACE MARCH 1963

INTERVIEWED WITH JAMES BEVELL 1955

THE CIVIL RIGHTS ACT 1964

AMERICAN CIVIL RIGHTS

SELECTED BLACK PEOPLE FOR HIGH LEVEL JOBS

JOHN F. KENNEDY 1961 - 1963

STRENGTH THROUGH 1962

THE VIETNAM

A bulletin board titled "USA Conflict at Home" featuring various historical photographs and text panels. The panels include "WASHINGTON PEACE MARCH 1963", "INTERVIEWED WITH JAMES BEVELL 1955", "THE CIVIL RIGHTS ACT 1964", "AMERICAN CIVIL RIGHTS", "SELECTED BLACK PEOPLE FOR HIGH LEVEL JOBS", "JOHN F. KENNEDY 1961 - 1963", "STRENGTH THROUGH 1962", and "THE VIETNAM".

Why Hedingham?

Hedingham Sixth Form gives you the best chance to fulfil your potential...

Our Sixth Form is small enough for everyone to get to know each other – a Sixth Form that has a real sense of community, which is intimate and friendly, offering each person the individual support they need and the freedom to express their personality.

Your future starts here... At Sixth Form you will study in ways that require higher levels of self-motivation and organisation, with plenty of support. You will be taught by specialist teachers in smaller groups within the classroom. There will be group guidance and also one-to-one tuition.

We will ensure that your independent study time is used purposefully and productively.

Alongside your academic programme at Hedingham you will get the chance to take part in a number of enrichment activities including the Sixth Form Leadership Programme,

mentoring, paired reading and tutoring other students. Whilst at Hedingham, you will also have talks and advice on student finance, how to apply to university and apprenticeships as well as visiting different universities. Hedingham also gives students the chance to take part in the nationally recognised Enterprise Challenge programme where you will work with a local business for a week.

The school day is from 8.40am until 3.15pm. You will have independent study time where you complete additional work set by your teachers on Microsoft Teams.

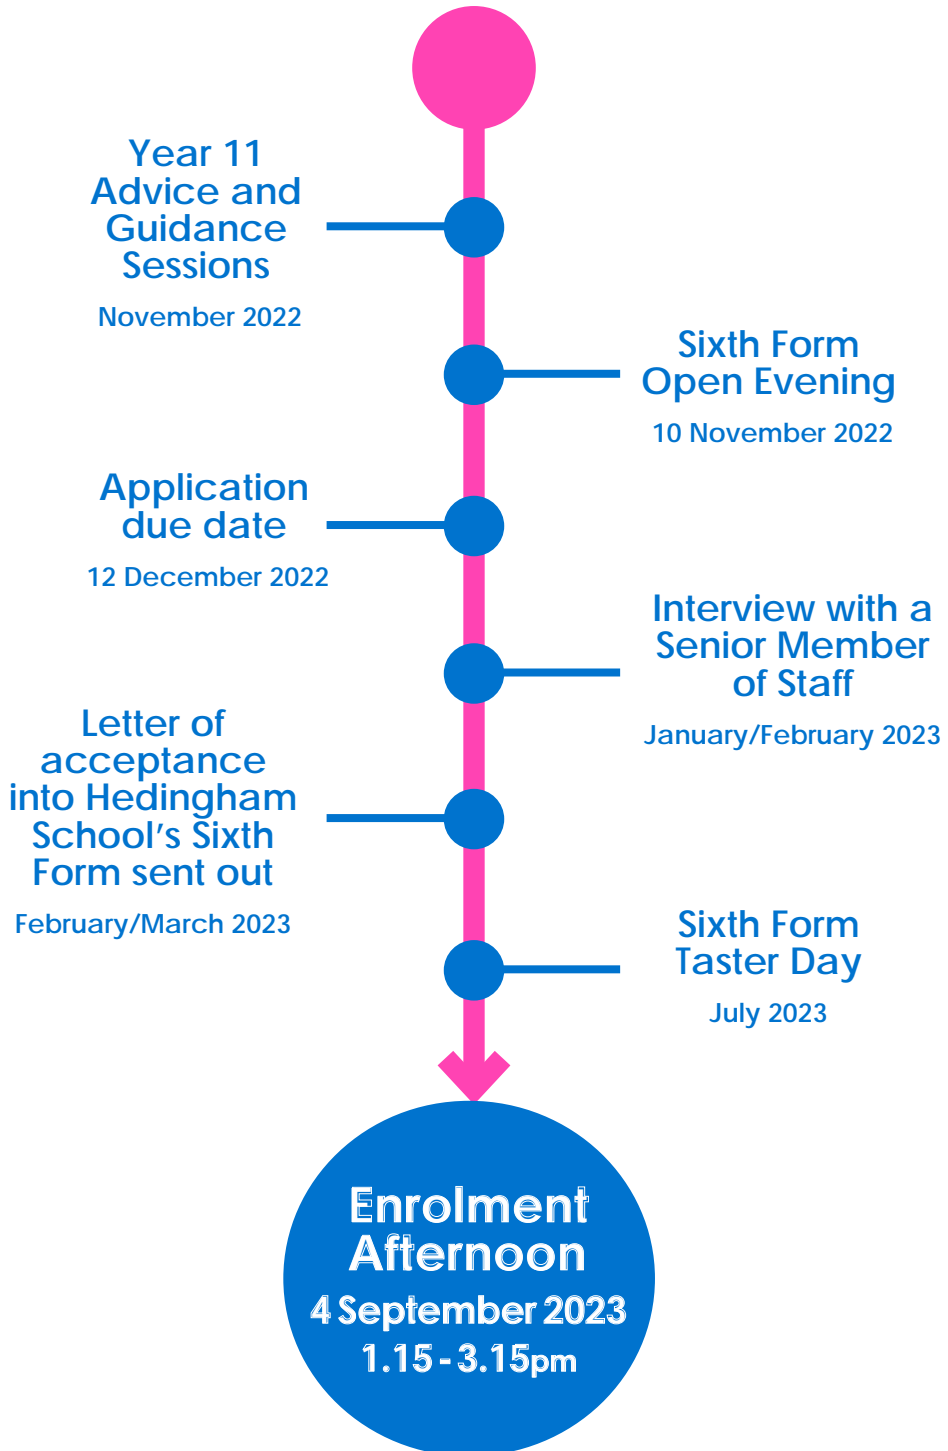

There are a wide range of enrichment activities which will enable you to develop your own interests or

to try new experiences which will help build your personal portfolio.

There will be opportunities for cultural trips abroad, New York, Italy, Iceland, Krakow, Wales, to mention but a few.

Application Process Timeline

Routes of Study

There are different combinations of subjects you can take at Hedingham that caters for different learning styles. These include

Level 3 qualifications, such as A levels, BTECs, T-Levels and Cambridge Technicals, Level 2 qualifications and GCSE resits in English

and Maths. Students may decide to follow a combination of A Levels and BTEC (Cambridge Technical) courses.

T-Level Programme

DIGITAL BUSINESS SERVICES

Level 3 Course Combinations

Combination of A Levels and Level 3 Vocational

Level 2/3 Programme Combinations

for example Child Development

Level 2 Programme Combinations

What are A Level Qualifications?

A Levels (short for Advanced Level) are the traditional qualifications that are offered by schools and colleges for students aged between 16 and 19.

There are many different A Level subjects that you can take – some will be subjects that you studied at GCSE and others may be new.

A Levels are graded from A - E and most universities will have a set entry requirement in relation to grades.

A Levels are highly valued by employers and universities so they can open lots of doors to further study and careers. Most A Levels are assessed through examinations, with some subjects offering a coursework element. Exams take place at the end of two years of study.

Which careers require A Levels?

Some careers require a degree, but you must have obtained certain A Levels to be able to get a place on that degree course. The following careers require an A Level in the subjects listed:

Veterinary Science: Biology and one or two subjects from Chemistry, Maths or Physics

Medicine: Chemistry and Biology

Computer Science: Maths

Dentistry: Chemistry, Biology and either Physics or Maths

Law: History and English Literature

If you have a specific degree or career in mind, it is really important for you to look at the entry requirements to those courses when you choose your A Levels.

What are T-Level Courses?

The T-Level course is a brand new, two-year qualification that is an alternative to an A Level, other post-16 courses or an apprenticeship.

T-Levels bring classroom learning and an extended industry placement together on a course designed with business and employers in mind. T-Levels have been introduced

to provide a rigorous Level 3 classroom based technical study programme equivalent to the standard of an A Level.

The Digital Business Services

T-Level course will consist of 80% classroom learning and 20% 'on the job' experience which takes place during an industry placement of a minimum of 45 days over two years.

What are Vocational Courses?

Vocational qualifications refer to work-related qualifications

Vocational courses offer a way of learning that is different to the traditional GCSEs and A Levels, but still allow you to achieve a grade that is an equivalent to these traditional qualifications. Vocational courses are more practical, allowing students to learn and experience real life situations they will encounter in their future careers.

Vocational courses have held onto their 'coursework' elements where many qualifications have not. This means that students,

who find examinations more challenging, can often achieve higher in vocational courses where they are assessed throughout the course on what they demonstrate rather than what they can remember for an exam.

At Hedingham we offer Vocational qualifications in BTECs and Cambridge Technicals.

Vocational courses are offered at different levels at Hedingham School, from Level 1 (skills based courses) through to Level 3.

Currently we offer BTEC and Cambridge Technical courses in Sport, Child Development, Digital Media, Performing Arts, Music, Business, ICT, Multi-Trade (Construction) and Workskills.

If you would like to learn more about the vocational provision at Hedingham School then please contact

Mr Batch, Leader of Vocational Education

What are Enrichment Courses?

Alongside your subjects most Sixth Formers choose to take an enrichment course to further boost their University application or career prospects. We offer a range of different courses, all of which will add value to your personal profile. These courses range from academic qualifications

to sporting awards or practical skills.

Community Sports
Leadership Award (CSLA)
Core Maths
Extended Project
Qualification (EPQ)
Photography

All of these qualifications are nationally recognised awards and some of them will give you UCAS points.

Some students may choose to complete a one year course in Photography and Digital Media. This will be discussed at interview.

Entry Requirements

A Levels, T-Levels and Level 3 Courses in BTEC and Cambridge Technical

Grade 4 GCSE in English and Maths plus three other Grade 4 GCSE passes. Please note: for individual courses a specific grade may be needed at GCSE for example Biology requires a Grade 6, or for

a T-Level, five Grade 4s at GCSE including English and Maths and prior knowledge of IT or Business Studies would be beneficial.

Students who have not achieved a Grade 4

or above in English and Maths will follow an agreed timetabled programme which will include a resit opportunity in the subjects.

BTEC Level 1 and 2

This is a one year course for students who wish to follow a Level 1 or 2 Programme. Students need to have gained a Grade 1 pass or above in

five GCSE subjects.

The programme will include provision for Maths and English, which may include resit opportunities.

All courses are only viable if there are sufficient student numbers.

Gulfoss, Iceland

Central Park,
New York

STUDY VISITS

You will have the opportunity to visit New York, Iceland, Krakow and also closer to home, Wales...

Aberaeron,
Wales

Mount Kenya,
Kenya

I have attended Hedingham School since 2016. After completing my GCSE exams, I joined the Sixth Form in order to obtain the best results I could at A Level. For me, Hedingham Sixth Form was an easy first choice as I was already comfortable with the school and felt that I had built up a good relationship with my teachers during my time in the lower school. Although there was still a big jump academically, heading into my A levels, I found this helpful and allowed me to adjust and speak to teachers in order to help keep my transition as smooth as possible.

Not only does Hedingham offer a huge range of subjects, ranging from the Sciences to the more creative subjects such as Art, Photography and Performing Arts, it also offers many curricular responsibilities. I took part in peer mentoring, animal well-being and the subject ambassador programme; these opportunities have allowed me to support younger students and make a difference to their time at Hedingham as well as help me to 'stand out' on my university application.

Once I have completed my studies here, I plan on going to university to study Physiotherapy. I believe Hedingham Sixth Form has provided me with the opportunity to reach my required entry grades as well as allowing me **as a person to flourish in confidence.**

Jamie Watts
Year13 Student

To help you succeed...

During your time at Hedingham there are many staff here to help you succeed to the best of your ability...

Head of Sixth Form Mr Rory Hyde
Deputy Head of Sixth Form Mr Gareth Nolan
Sixth Form Assistants Mrs Sue Miley
Mrs Lisa Black

Tutors Mr Darren Batch
Mr James Gamble
Miss Emma Hodgson
Mr Patrick Sadler
Miss Elizabeth Salmon
Mr Rupert Sanders
Mr Tom Wadsworth
Miss Hannah Wallis

In form time, you will take part in a mentoring programme where you will receive one to one mentoring from your tutor on a range of issues, from academic to your future plans.

Challenge which gives you the chance to work with a local company to solve a series of challenges.

During your time at Hedingham you will be given professional advice on applying for higher education, apprenticeships and careers. Hedingham has some outstanding teachers that are there at all times to help you with all aspects of your work.

You will also have an opportunity to join the active Sixth Form Council which organises various events throughout the year. There are also many once in a lifetime trips that you can go on that will give you the chance to see and experience incredible places like Iceland and Auschwitz as well as cities like Florence and New York.

Hedingham Sixth Form also runs a one-week business simulation called Enterprise

A WIDE
CHOICE OF
COURSES

Closing Date for
your application is

2022

A LEVEL COURSES

Mia Clark
Year 13 Student

Art and Design: Fine Art

Examination Group: OCR

As a student who has a passion and talent for Art, studying at A-Level is an excellent opportunity for you to experiment, explore and develop practical skills in Art. A Fine Art A-level is important for those who are wishing to choose an Art related degree course or career, and it will fit well with any other course of study, especially Art & Design subjects.

The Art Department is a calm, focused environment, where you will be supported to work independently. You will have access to all the Art rooms and resources, and we actively encourage students to use these spaces as their studio during their study periods.

You will study a Fine Art specification, which includes drawing, painting, print making, etc. Throughout, there is a focus on the sketchbook as an

artefact and a place to experiment, explore and develop your work

Year 12 content

Unit 1: Foundation Project

For your first project, you will investigate and experiment with drawing techniques and media, in order to extend your skills and your visual language. You will do direct observational drawing, in an explorative and experimental way. Through analysis of both representational and abstract artists' work, you will grow your expressive abilities and learn how to develop your ideas

Unit 2: Landscape Project

Investigating others' work is central to your growth as an artist, and you will study one contemporary and one historical landscape painter in your second project. This will push your understanding of technique further. You will experiment with different medias and

methods of drawing and painting and learn how to develop your own ideas and personal outcomes to meet the assessment criteria of A-Level.

Unit 3: Figure Project &

Unit 4: Abstraction Project

Developing the skills learnt in Unit 2, in your next two projects you will explore the work of two contemporary figure painters and two abstract painters, making personal outcomes based on your investigations.

Year 13 content

Unit 5: Critical Study

Forming part of your assessed coursework, this is a sketchbook based, illustrated essay (3000 words). You will investigate two artists in depth who have been influences on the artist you have chosen to explore for your Personal Investigation.

You will identify your own line of enquiry and relate your study to your own development as an artist

Unit 6: Personal Investigation

For your assessed practical work, you will determine your own line of enquiry/ focus of study, based on an artist of your choice. Through drawing, artist analysis and written reflection, you will explore and develop your own ideas, producing sketchbooks and final pieces for an end of course exhibition and a portfolio of work which will also be suitable for an application to Art & Design courses.

Gracie Flin
Year 13 Student

CONTINUED OVERLEAF

Unit 7: Controlled

Assessment (15 hours)

You will receive your exam paper in February of Year 13, and you will have 3 months to prepare your exam sketchbook in your own time with guidance from your Art teachers. At the end of this period, you will complete your final piece during a 15-hour practical exam. Your work on Unit 4 will continue throughout this period.

Assessment

A2 Art courses are assessed through 60% coursework and 40% examination.

Pathways/Careers/University courses

Studying Art can lead to many different degree courses and careers in Art & Design, such as Illustration, Games Design, Architecture, Interior Design, Graphic Design, Product Design, Art Therapy, Fashion & Textiles, Advertising, Animation, Teaching, Curation and Visual Art.

Foundation courses are available at colleges post A-Level if you are unsure of your area of study, and wish to explore creative pathways in more depth before applying for a degree.

Many of our students progress onto Art & Design degree courses such as Fine Art, Illustration and Architecture. Art is a versatile qualification, and even for those considering a less creative career, a good result in Art A-Level could contribute to towards UCAS points for any Higher Education course of study

Entry Requirements

Students are required to meet the school's A Level entry requirements. A Grade 6 in GCSE Art is preferable.

For more information see [Mr Nancarrow](#) **Leader of Art**

Cecilia Snell
Year 13 Student

Biology

Examination Group: Edexcel

Students at Hedingham School follow the Pearson Edexcel Biology A specification 9BNO (A Level). This has been designed to encourage and inspire students by showing how an understanding of many contemporary issues requires a grasp of fundamental biological ideas.

Biology is the study of living organisms. The A level course is wide-ranging including biochemistry, physiology, ecology, genetics, cell biology, evolutionary theory and immunology. There is an emphasis on practical work with 18 core practical investigations over two years. Students will be taught to think critically according to the scientific method and to develop practical scientific skills.

Year 12 content

Unit 1: Lifestyle, health and risk – through the study of cardiovascular disease

Unit 2: Genes and health – cystic fibrosis, cause, symptoms and inheritance

Unit 3: Voice of the Genome – the interactions between genes and environment

Unit 4: Biodiversity and natural resources – adaptations and evolution

Year 13 content

Unit 5: On the wild side – photosynthesis, ecology and climate change

Unit 6: Infection, immunity and forensics – through TB and HIV/AIDS

Unit 7: Run for your life – respiration, muscle contraction and sport

Unit 8: Grey matter – nerve impulses, synapses and the brain

Assessment

100% examination at end of Year 2

Paper 1: The Natural Environment and Species Survival (100 marks, 2 hours)

Paper 2: Energy, Exercise and Coordination (100 marks, 2 hours)

Paper 3: General and Practical Applications in Biology (100 marks, 2 hours)

All papers contain questions including multiple-choice, short open, open-response, calculations, and extended writing questions.

Paper 1 contains topics 1-6. Paper 2 contains topics 1-4 and 7-8. Paper 3 contains topics 1-8, the paper will also include synoptic questions that may draw on two or more different topics. A pre-release scientific article will underpin one section of the paper. 10% of the marks are awarded for mathematical skills.

Science Practical Endorsement

Students are internally assessed by teachers to ensure that they continue to develop their core practical skills supporting the theory discussed in lessons and develop their practical skills in preparation for University level experiments.

Pathways/Careers/University courses

Biology is very important for anyone interested in studying a university course or pursuing a career in: Scientific Research, Medicine, Veterinary Science, Agricultural or Environmental Sciences, the Pharmaceutical Industry, Teaching or Conservation.

Entry Requirements

Students will need a Grade 6 at GCSE Biology or 6-6 in Combined Science, Grade 6 in Maths and three other grades 4-9 subjects (including English).

For more information see [Mr Sanders Key Stage 5 Science Co-ordinator](#)

Business Studies Examination Group: OCR

Studying A Level Business will give you a thorough consideration of the way in which businesses operate in the modern, ever changing world. You will gain knowledge and understanding of the key aspects of business decision making, and the impacts these have on the business and its stakeholders. You will investigate different types of businesses with an emphasis on what the importance and consequences are for them and why they differ depending on size. There will be in-depth discussion on how businesses confront issues, and tackle the challenges these issues raise. There will also be opportunities to engage in activities and talks provided by businesses and outside agencies.

The stimulating specification content encourages students who wish to develop their skills as independent learners, critical thinkers and decision-makers – all personal assets that can make them stand out as they progress to higher education and/or the workplace.

Year 12 content

Unit 1: Introduction to Business

Unit 2: Business objectives and strategy

Unit 3: External influences

Unit 4: Accounting and finance

Year 13 content

Unit 5: Human resource management

Unit 6: Marketing

Unit 7 Operations management

Assessment

100% examination at end of Year 2.

Paper 1: Operating in a local business environment

Paper 2: The UK business environment

Paper 3: The global business environment

Pathways/Careers/ University courses

This course is ideal for students who want to go on to higher education or make business their career choice and offers progression to higher education, employment or apprenticeships. Students could then go on to a career in Law, Business or Finance for example.

Entry Requirements

Students are required to have met the school's A Level entry requirements. A Grade 4 in Business GCSE is preferable.

For more information see [Mr Illingworth](#)
[Leader of Business](#)

Chemistry

Examination Group: Edexcel

Students at Hedingham School follow the Pearson Edexcel Chemistry specification at A Level. This has been designed to help students understand the world in which we live and underpins a wide range of science-based degree courses and careers.

A Level Chemistry helps students to develop skills such as research, problem solving and analytical skills. Students learn to challenge ideas and develop logical process through step-by-step reasoning. Students also learn to develop their teamwork and communication skills, as well as improving on their practical based skills learnt during the GCSE course.

Year 12 content

Unit 1: Atomic structure and the Periodic table

Unit 2: Chemical bonding and structure

Unit 3: Redox reactions

Unit 4: Inorganic chemistry & the Periodic Table

Unit 5: Formulae, equations and amounts of substance

**Unit 6: Organic Chemistry
Unit 7: Modern and Analytical Techniques**

Unit 8: Chemical Energetics

Unit 9: Reaction kinetics

Unit 10: Chemical equilibrium

Year 13 content

Unit 11 Further Equilibrium

Unit 12: Acid-base equilibrium

Unit 13 Further energetics

Unit 14: Further redox

Unit 15: Transition metals

Unit 16: Further kinetics

Unit 17: Further organic chemistry

Assessment

100% examination at end of Year 2

Paper 1: Advanced Inorganic and Physical Chemistry (90 marks, 1 hour 45 minutes)

Paper 2: Advanced Organic and Physical Chemistry (90 marks, 1 hour 45 minutes)

Paper 3: General and Practical Principles in Chemistry (120 marks, 2 hours 30 minutes)

All papers may include multiple choice, short open, open response, calculations, and extended writing questions.

Science Practical Endorsement, students are internally assessed by teachers to ensure that they continue to develop their core practical skills supporting the theory discussed in lessons and develop their practical skills in preparation for university level experiments.

Pathways/Careers/University courses

Chemistry is a challenging yet exciting subject. Success in this subject will allow students to follow university courses or careers in Medicine, Veterinary Science, Forensic Science, the Pharmaceutical Industry, Biochemistry, Pharmacology, Research and Development and Environmental Science amongst others.

Entry Requirements

Students will need a Grade 6 at GCSE Chemistry or 6-6 in Combined Science, Grade 6 in Maths and three other grades 4-9 subjects (including English).

For more information see [Mr Sanders Key Stage 5 Science Co-ordinator](#)

Computer Science

Examination Group: AQA

Computer Science is the study of the principles and uses of computers. It teaches you the knowledge to understand what is happening inside a computer, and the subsequent skills required to make the computer carry out your commands.

This course will teach you a range of analytical and lateral thinking skills to design algorithms and programs to solve a variety of different problems. This combines the learning of advanced programming skills, abstraction and decomposition tools, and developing a knowledge of the computer systems architecture. You will learn about how data is stored and transferred across networks and will build logical and verbal reasoning skills to be applied across a wide variety of different problem-solving scenarios.

Year 12 content

Topic 1: Programming

You will develop advanced programming skills using Python, introducing new programming paradigms such as Object Oriented and Event-Driven programming, including the creation of Graphical User Interfaces.

Topic 2 & 3: Data Structures & Algorithms

You will learn about how data structures are conceptually modelled using different visual tools and will learn about standard algorithms to search and sort data sets. This includes optimization algorithms to find the best way to carry out specific tasks.

Topic 4: Finite State Machines and Pattern Recognition

You will learn about creating and represent finite state machines using state diagrams to solve computable problems. You will use these finite state machines to recognise and generate acceptable data patterns. You will also learn about classifying algorithms by their Time (processing) and Space (memory) complexity.

Topic 5: Data Representation and Encryption

You will learn different ways data is represented within a computer including Binary

and Hexadecimal. You will learn about character coding schemes, creating digital images and sounds, and how error checking and encryption techniques can be used on transmitted data.

Year 13 content

Topic 6: Boolean Algebra and Logic Gates

You will learn about how electrical signal patterns are manipulated by a computer to generate a required output including how to represent logic gate circuits using algebraic expressions and simplify logic circuits to their simplest form using the rules of Boolean algebra.

Topic 7: Hardware & Software

You will look at the principles of all computer hardware, studying specific devices and components. You will learn about the fetch-execute cycle and will learn how to write simple CPU executable programs using assembly language instructions.

Topic 8: Moral, Ethical, Legal and Cultural Issues

You will learn about the vast implications of computer-based systems, including the impact of computers on moral, ethical, legal and cultural issues.

Topic 9: Networking

You will learn the main principles behind computer networking, data transmission and the creation of TCP/IP based networks including the internet.

Topic 10: Databases & SQL

You will learn about how information is stored in relational databases. You will use Structured Query Language (SQL) to create, retrieve, update and delete data from an SQL database.

Topic 11: Functional Programming

You will learn about an alternative programming paradigm called functional programming and you will create and modify simple functional programs.

NEA - Non-Examined Assessment

You will develop a piece of coursework for a data processing problem of your choosing. You will create the program code (including an appropriate Graphical User Interface) and will build a series of supporting documentation to demonstrate your ability to analyse, design, implement, test and evaluate a system.

Assessment

Paper 1 - On Screen
(40% of A-Level)
Paper 2 - Paper Exam
(40% of A-Level)
NEA Coursework
(20% of A-Level)

**Pathways/Careers/
University courses**

This could lead to a career working in computer programming, systems engineering, eSports etc. This course would provide suitable footing for university courses such as Artificial Intelligence (BSc), Systems Programming (BSc), Computer Games Development (BSc), Creative Computing (Web Technologies) (BSc).

Entry Requirements

Five Grade 4's or above at GCSE, including English and Maths. A Grade 5 in a GCSE Computer Science qualification is also required; students without will be considered if they can demonstrate excellent pre-existing programming skills.

For more information see [Mr Poston](#)
[Leader of Computer Science & ICT](#)

Three Dimensional Design

Examination Group: OCR

This is an exciting new A Level course that enables students to design, present and make any three dimensional product using a wide variety of materials and processes.

The course will enable you to demonstrate the creative and practical skills that are required for a broad range of careers such as Architecture, Engineering, Interior Design, Furniture Design and Set Design

Year 12 content

Unit 1 :

Foundation skills- Students will design, present and make a range of products focusing on different materials, processes and equipment in preparation for their A Level coursework.

Years 12 & 13 content

Unit 2:

A Level coursework (60%)
Students will design, present and make any three dimensional product of their own choice and use any materials and processes to manufacture the product.

This work will also include a 1000-3000 word investigation, to research and analyse the work of an established designer that the student has chosen to study.

Year 13 content

Unit 3:

A Level practical exam (40%)

This is a 15 hour practical design, present and make task; in which students focus on one design context chosen from seven possible design contexts set by the exam board.

The design, present and make contexts are published on 1st February by the exam board and students can research, practice, prepare and develop their ideas during the second term of year 13 in advance of the practical exam.

Assessment

*A Level coursework
60% (internally marked
and externally moderated)*

*A Level practical exam
40% (internally marked
and externally moderated)*

Pathways/Careers/ University courses

The A Level in Three Dimensional Design will provide students with a direct pathway into degree courses in Architecture, Engineering, Set Design, Interior Design, Furniture Design and a wide variety of courses and careers in design and creative disciplines.

Entry Requirements

Students should have achieved at least a Level 5 in GCSE Three Dimensional Design, Graphic Design or Design Technology and meet the schools A Level entry requirements. Students should only consider taking this course if they possess very strong freehand drawing and CAD skills, along with creative design and practical skills. All work can be completed using a range of freehand drawing/making skills as well as using digital media including Computer Aided Design and Manufacturing processes.

For more information see

Mr Gamble
**Leader of Design
and Technology**

Toby Halls
Year 13 Student

English Literature Examination Group: AQA

A Level English Literature involves the study of literary movements, eras and genres. It explores universal themes and encourages students with a shared passion for reading to become confident critics. This course builds on the skills developed at GCSE by engaging creatively and critically with a wide range of texts and discourses. It will help you to develop your autonomy as a reader and as a critic of a wide range of literature, both classic and modern. In addition, this course prepares you for any other university course that demands the ability to argue and defend a point of view, to be open-minded and to use inference and deduction.

The A Level course encourages the exploration of texts in a number of different ways. You will engage with two of the main historicist perspectives; texts written across widely different time periods that explore the same theme and those written within a narrower and clearly defined time period. It entails the study of various texts, both singly and comparatively. You are required to read widely across a range of texts and connect them across time and topic.

Year 12 content

Unit 1:

'Love Through the Ages': Paper 1 involves the study of a Shakespeare play, a novel and a pre-1900 poetry anthology as well as approaches to unseen poetry. The historicist approach of exploring a key theme as seen over time encourages you to evaluate the relationships that exist between texts and the context in which they are written, received and understood.

Year 13 content

Unit 2:

'Literature from 1945 to the Present Day':

Paper 2 involves the study of three texts within a shared time period: One prose, one poetry and one drama. Focusing on contemporary literature, areas to be explored include personal and social identity, changing morality and resistance and rebellion.

Unit 3:

'Texts across Time':

This coursework unit involves a comparative critical study of two texts. It provides a challenging and wide ranging opportunity for independent study. You are able to pursue your own interests through comprehensive independent reading. The comparative critical study is based on a theme of your

choice, for example the representation of gender, the gothic, the struggle for identity or crime and punishment.

Assessment

Paper 1: (40%) three hour written exam

Paper 2: (40%) two hours 30 minutes written exam

NEA: Non-exam assessment (20%) 2,500 word *Independent Critical Study*.

Pathways/Careers/University courses

This course would go well with Media Studies, Sociology, History, Philosophy and any subject that requires higher level communication skills. English Literature is useful for careers in Law, Business, the Media, Teaching and Journalism. In all careers, of course, the ability to communicate effectively is essential.

Entry Requirements

Students are required to meet the school's A Level entry requirements. A Grade 5 in English is preferable.

For more information see [Ms Barker](#) [Leader of English](#)

French Examination Group: AQA

This course will broaden students' horizons. Students will learn to develop language skills through the study of four set topic areas which will be covered during the 2-year course. They will develop a wide range of vocabulary and accurate grammar. They will also expand their knowledge and interest in contemporary French culture. They will be able to read French magazines, newspapers and websites, and understand contemporary spoken French from TV and radio. If you are an enthusiastic linguist, this course is for you.

Year 12 content

Unit 1: Aspects of French-speaking society: current trends

The changing state of the family,

The digital world (*internet, social media, digitalisation*)

Voluntary work

Unit 2: Artistic culture in the French Speaking world

National heritage

Contemporary Francophone

Music

Cinema

Film: Students will study the film '*l'auberge espagnole*'. They must also be able to construct essays, learn vocabulary and grammar thoroughly. They will be expected to contribute to discussion work, handle documentary source analysis confidently, and carry out research on the film.

Grammar: Students will expand upon the grammatical knowledge they have acquired at GCSE. They will learn to use more sophisticated language and structures.

Year 13 content

Unit 3: Aspects of French-speaking society: current issues:

Aspects of a diverse society
Marginalised people
Criminals

Unit 4: Aspects of political life in the French speaking world:

Teenagers, the right to vote and politics

The role of strikes

Politics and immigration

Grammar: Students will expand upon the grammatical knowledge they have acquired at GCSE. They will learn to use more sophisticated language and structures.

Literary text: Students will study the book '*Bonjour tristesse*'. Students must also be able to construct essays, learn vocabulary and grammar thoroughly. They will be expected to contribute to discussion work, handle documentary source analysis confidently, and carry out research on literary texts.

Assessment

Paper 1:

Listening, reading, writing (translations
(42% weighting 2 hours 30 minutes)

Students will be assessed on listening and reading comprehensions. They will have to write in the target language on one of the four topics above.

Paper 2: Writing: translation, film and literary text essay (33% weighting 2 hours).

Paper 3: Speaking 25% weighting (5 minutes preparation plus 16-18 minutes). Conducted by your teacher. Answer 3 questions on a card covering core content 1 to 4 and ask one question during the exam

Section One: discussion on stimulus material (choice of two) – 5 to 6 minutes.

Section Two: *discussion of the IRP independent research project*

2 min presentation and 9 to 10 minutes discussion.

In Year 12 there will be one official mock exam in and many exam practices for all papers throughout the 2-year course.

Pathways/Careers/ University courses

Further studies in French will open up more opportunities in higher education as well as the world of work. It will improve employability in International and European companies and show that you have superior linguistic competence and language skills.

Entry Requirements

Students are required to have met the school's A Level entry requirements and gained a Grade 5 in French at GCSE.

For more information see [Miss Dèzert](#)
[Leader of Modern Foreign Languages](#)

Further Mathematics Examination Group: Edexcel

This is a challenging course that will be very beneficial if you have plans to study Mathematics or Engineering at university. It is possible to take this subject as an AS qualification over two years.

It has the reputation of developing students' logical thinking and problem-solving skills. Ideal for students who want to extend their knowledge of Mathematics beyond A Level

Years 12 & 13 content

Unit 1: Further Core 1: This unit includes topics such as:

Proof
Complex numbers
Matrices
Further Algebra and Functions.

Unit 2: Further Core 2; This unit includes topics such as:

Further calculus
Further vectors
Polar coordinates
Hyperbolic functions
Differential equations in both Units 1 and 2.

Unit 3: Decision;

This unit is different to anything studied in the Maths A Level and includes topics such as:

Algorithms and graph theory
Algorithms on graphs II
Critical path analysis
Linear Programming.

Unit 4: Further Mechanics;

This unit builds on the Mechanics taught as part of the Maths A Level course. Topics include:

Momentum and impulse
Work and energy
Elastic strings and springs and elastic energy
Elastic collisions in one dimension
Elastic collisions in two dimensions.

Assessment

Students will be assessed by *four 1 ½ hour exams* at the end of the two-year course. Each exam is worth 25% of students' overall grade.

Exam 1; Further Core contains questions based on the work studied in both Units 1 and 2.

Exam 2; Further Core contains questions based on the work studied in both Units 1 and 2.

Exam 3; Decision contains questions based on Unit 3.

Exam 4; Further Mechanics contains questions based on Unit 4.

Pathways/Careers/University courses

A wide range of degree/career options including Mathematics, Science related degrees, Finance, Accountancy, Data Analysis and Engineering

Entry Requirements

Students need to have been entered for the higher tier and we will expect them to have achieved a Grade 8 or above at GCSE. Students must also be studying A Level Maths to take this course.

For more information see [Mrs Woodley](#)
Leader of Mathematics

Geography

Examination Group: Edexcel / Pearson

This subject will appeal to anyone who is interested in current affairs, the natural environment and the world around them and enjoys a subject that is relevant to our lives in the 21st century. Geography A Level will give you opportunities to explore issues and to carry out practical work in the field and develop teamwork skills.

Geography leads to a wide range of careers and university courses such as Environmental Science, Geology, International Development, Politics and Law, Social Sciences, Urban Planning, Teaching or Engineering.

Geography will go very well with any other academic A Level subject especially Business Studies, Social Sciences, Humanities, English, Maths and Science subjects.

Russell Group universities considered Geography to be one of their preferred 'facilitating subjects' at A level and many university courses which require students to study sciences at A level include Geography as a science subject. Geography graduates are particularly sought after by employers.

Years 12 & 13 content

You will be required to complete four days of fieldwork and there will be some cost attached to this. The skills which you learn during this fieldwork will lead to you developing your independent investigation (coursework).

Unit 1: Tectonic processes and landscapes

Unit 2: Coastal landscapes and change

Unit 3: Globalisation

Unit 4: Regenerating places

Unit 5: The water cycle and water insecurity

Unit 6: The carbon cycle and energy security

Unit 7: Superpowers

Unit 8: Migration, identity and sovereignty

Assessment

There will be three examinations at the end of Year 13

Paper 1 is on the physical geography modules. It is 2 ¼ hours long and worth 30%.

Paper 2 is on the human geography modules. It is 2 ¼ hours long and worth 30%.

Paper 3 is 2 ¼ hours. It is a synoptic investigation. It is worth 20%
NEA (coursework) is worth 20%.

Pathways/Careers/ University courses

Geography is considered by universities to be one of their preferred, facilitating subjects. Most university courses which require a number of 'Science' A Levels identify Geography as being one of these. Geography A Level will enable you to progress to virtually any degree course as well as a Geography one. Geography students are some of the most employable.

Entry Requirements

Students are required to meet the school's A Level entry requirements. A Grade 5 in both Geography and Maths at GCSE is preferable

For more information see [Miss Salmon](#)
[Leader of Geography](#)

German Examination Group: AQA

Students will learn to develop language skills through the study of four set topic areas which will be covered during the 2-year course. They will be expected to develop a wide range of vocabulary and accurate grammar. They will also expand their knowledge and interest in contemporary German culture. Students will learn to write report summaries and essays, hold conversations in German and take part in debates about German culture and society. They will be able to read German magazines, newspapers and websites, and understand contemporary spoken German from TV and radio. If you are an enthusiastic linguist, this course is for you.

Year 12 content

Unit 1: Aspect of German

Speaking society: current trends

The changing state of the family,

The digital world (internet, social media, digitalisation)

Youth culture: fashion and trends, music, television

Unit 2: Artistic culture in the German speaking world:

Festivals and traditions

Art and architecture

Cultural life in Berlin, past and present

Film: Students will study the film *'Good-bye Lenin'*. They must also be able to construct essays, learn vocabulary and grammar thoroughly. They will be expected to contribute to discussion work, handle documentary source analysis confidently, and carry out research on the film.

Grammar: Students will expand upon the grammatical knowledge they have acquired at GCSE. They will learn to use more sophisticated language and structures.

Year 13 content

Unit 3: Multiculturalism in German speaking society:

Immigration

Integration

Racism

Unit 4: Aspect of political life in the German speaking world:

Germany and the European Union

Politics and youth

German re-unification and its consequences

Grammar: Students will expand upon the grammatical knowledge they have acquired at GCSE. They will learn to use more sophisticated language and structures.

Literary text: Students will study the book *'Der Vorleser'*. Students must also be able to construct essays, learn vocabulary and grammar thoroughly. They will be expected to contribute to discussion work, handle documentary source analysis confidently, and carry out research on literary texts.

Assessment

Paper 1:

Listening, reading, writing translations
(42% weighting 2 hours 30 minutes)

Students will be assessed on listening and reading comprehensions. They will have to write in the target language on one of the four topics above.

Paper 2: Writing: translation, film and literary text essay
(33% weighting 2 hours)

Paper 3: Speaking 25% weighting (5 minutes preparation plus 16-18 minutes). Conducted by your teacher. Answer 3 questions on a card covering core content 1 to 4 and ask one question during the exam

Section One: discussion on stimulus material (choice of two) – 5 to 6 minutes.

Section Two: discussion of the IRP independent research project

2 minutes presentation and 9 to 10 minutes discussion.

In Year 12 there will be one official mock exam in and many exam practices for all papers throughout the 2-year course.

Pathways/Careers/University courses

Further studies in German will open up more opportunities in higher education as well as the world of work. It will improve employability in International and European companies and show that you have superior linguistic competence and language skills.

Entry Requirements

Students are required to have met the school's A Level entry requirements and gained a Grade 5 in German at GCSE.

For more information see [Miss Dèzert Leader of Modern Foreign Languages](#)

History

Examination Group: Edexcel

History gives students an insight into the world we live in, exploring past conflicts, ideologies and social issues. This gives us an understanding of the forces that have shaped the modern world.

In year 12 the course focuses on Nationalism, Dictatorship and Democracy in 20th century Europe. Whilst in year 13 we focus on the conflicts of the Wars of the Roses. This course is suited to anyone with an interest in History, and works well with subjects like Government and Politics.

Year 12 content

Unit 1: Germany and West Germany, 1918 - 1989

Unit 2: The Rise and Fall of Fascism in Italy, c1911 - 1949

Year 13 content

Unit 3: Lancastrians, Yorkists and Henry VII, 1399 - 1509

Unit 4: Coursework

Assessment

80% assessment and 20% coursework at the end of Year 2

Unit 1: *An exam paper of 2hrs 15 minutes comprising of 3 questions. Worth 30% of the overall A Level*

Unit 2: *An exam of 1hr 30 minutes comprising of 2 questions. Worth 20% of the overall A Level*

Unit 3: *An exam of 2hrs 15 minutes, comprising of 3 questions. Worth 30% of the overall A Level*

Unit 4: *An independent piece of writing between 3000 – 4000 words. Worth 20% of the total A Level*

Pathways/Careers/University courses

History is seen as a "facilitating subject" by universities meaning it does not limit your options. A Level students in the past have gone on to study degrees in, History, Law, Politics, International Relations, Sociology, Psychology and many more.

As well as more obvious careers such those in the heritage sector or education, history graduates also feature heavily in the legal profession and civil service.

Entry Requirements

Students must have met the school's A Level requirement, and a Grade 5 in GCSE History is preferable.

For more information see [Miss Wallis Leader of History](#)

Mathematics

Examination Group: Edexcel

Mathematics is a challenging course that will prepare you for a wide variety of university or employment opportunities. It has the reputation of developing students' logical thinking and problem-solving skills.

This course would go well with any subject, particularly Biology, Chemistry, Physics, Computer Science and Business Studies.

Year 12 content

Unit 1: Pure Maths 1: Taught in Year 12, this unit provides a continuation from topics taught at GCSE, like Trigonometry and Algebraic graphs and also introduces brand new topics such as Differentiation and Integration.

Year 12/13 content

Unit 3: Statistics; Taught across both years, this unit looks at displaying and interpreting data, along with Probability.

Unit 4: Mechanics; Taught across both years, this unit has strong links with Physics, involving work on forces, acceleration and equations of motion.

Year 13 content

Unit 2: Pure Maths 2: Taught in Year 13, this unit continues to develop the topics taught in Pure Maths 1.

Assessment

Students will be assessed by three 2 hour exams at the end of the two-year course. Each exam is worth a third of students' overall grade.

Exam 1: Pure Maths contains questions based on the work studied in both Units 1 and 2.

Exam 2; Pure Maths contains questions based on the work studied in both Units 1 and 2.

Exam 3; Statistics and Mechanics contains questions based on work studied in both Units 3 and 4.

Pathways/Careers/University courses

A wide range of degree/ career options including Mathematics, Science related degrees, Finance, Accountancy, Data Analysis and Engineering.

Entry Requirements

Students need to have met the School's entry requirements and been entered for the higher tier in Maths. We will expect them to have achieved a Grade 7 or above at GCSE.

For more information see [Mrs Woodley](#)
[Leader of Mathematics](#)

Media Examination Group: Eduqas

Media products and platforms dominate our daily lives, and so it is important to understand the processes and the influence they can have over us.

Studying Media not only gives you an insight into the industry and the ever-changing world around us, but also improves analytical skills, writing skills, creativity, confidence, and the ability to form an argument.

Years 12 & 13 content

Unit 1: Media Products, Industries & Audiences

(Written exam - 35%)

Media language Representation

Industries & Audiences

You will study a number of case studies across different media platforms such as music videos, video games, newspapers, television, radio and film marketing.

Unit 2: Media Forms & Products in Depth

(Written exam - 35%)

TV in the Global Age

Magazines: Mainstream & Alternative, Media in the Online Age.

You will do an in-depth study of six case studies across three platforms: Black Mirror & The Returned (TV) Huck & Woman's Realm (Magazines) KSI & Attitude (Online)

Unit 3: Making a Media Product

(Coursework - 30%)

Music Video. You will plan, film and edit your own music video to your chosen song. Editing will take place on Adobe Premiere Pro on the iMacs in the media suite.

Or,

Magazine. You will plan, write, take photos and design four pages of a new magazine. You will use software such as Adobe InDesign & Adobe Photoshop using the iMacs in the media suite.

Assessment

70% Exam

30% Coursework

Pathways/Careers/ University courses

Recent figures suggest that 1 in 11 UK jobs are related to the creative industries. Those who study Media open the doors to a number of different career paths, ranging from the Film & TV industry, to marketing, social media and video games development. The course also teaches valuable transferrable skills that would be beneficial to any career choice.

Entry Requirements

Students are required to have met the Sixth Form's A Level entry requirements. A Grade 4 GCSE in Media Studies would be beneficial but is not required.

For more information see

[Miss Hodgson](#)

[Leader of Media & Photography](#)

Philosophy

Examination Group: AQA

This is a course that develops both depth of thought and breadth of understanding.

What is real?

Why should we follow rules?

What is knowledge?

What is evil?

If these questions interest you, choose Philosophy.

Philosophy is concerned with ultimate questions of meaning and purpose, such as the nature of truth.

Ethics is the study of right and wrong, and will help students analyse some of the moral problems facing society today, including whether it is right to kill animals or whether simulated killing is ethical.

The course will develop a range of skills, including enquiry, interpretation, analysis and reasoning.

Students should enjoy in-depth thinking, even where there is no definite answer, and learning through discussion and debate. Philosophy A Level provides a good foundation to many university courses and careers, ranging from Law and Journalism to Teaching. It is also a good basis for the Social Sciences. This A Level helps you develop excellent communication and critical

thinking skills.

Year 12 content

Unit 1: Epistemology;

The theory of knowledge. Can we ever know what is real?

Can we trust our senses to inform us what the world is like?

Unit 2: Moral Philosophy:

Exploring different moral theories and how they determine what is the right and wrong thing to do. The course looks at Utilitarianism, Kantian and Virtue ethics. These theories are applied to scenarios such as lying, simulated killing and other real world situations.

Year 13 content

Unit 3: Metaphysics of the mind:

What is the mind? Is our mind simply a by product of a physical brain operating a body or is there something more to it? Exploring the idea of consciousness.

Unit 4: Metaphysics of God:

Evaluating arguments about the existence of a divine being. These arguments have been around for centuries. They do not necessarily prove the existence of a biblical God. The main arguments are the Ontological, Teleological and Cosmological. You will also explore the problem of evil which is seen as the strongest argument

against an all loving deity.

Assessment

100% Examination at end of Year 2

Pathways/Careers/ University courses

The study of Philosophy is a very good mix with other subjects.

There are many courses which are joint Philosophy including Maths, Science and English Literature.

Entry Requirements

Students must have met the School's entry requirements. A Grade 5 in English GCSE is recommended.

For more information see [Mrs Tyler, Leader of Religion, Values & Ethics](#)

Photography

Examination Group: OCR

A course for anyone with a keen interest in photography and design.

Students taking this course have the opportunity to study photography in detail. This will give students the chance to learn the practical and theoretical skills involved in this industry.

Year 12 content

Unit 1: Introduction to photography

This unit will cover the basics of photography as well as allowing you to explore different mediums such as portrait, landscape, still life etc. You will gain both creative and technical skills to take forward in your work.

Unit 2: Coursework

Element 1 Related Study (3000 words)

You will choose two photographers to study in detail and re-create some of their pieces.

Unit 3: Coursework

Element 2 Practical Portfolio

This is the largest body of work that you will create and is your own personal exploration of a particular medium of photography.

Year 13 content

Continuation of Unit 3: Coursework Element 2 Practical Portfolio

Unit 4: Externally set task (exam). A response to a pre-released brief culminating in a 15 hour controlled assessment.

Assessment

40% Exam – at the end of Year 2

60% Coursework portfolio

Pathways/Careers/University courses

This course will work well in combination with many subjects, including Art, Dance and Media. However, it would also stand alone for students who have a particular interest in photography and wish to improve their skills while gaining a nationally recognised qualification.

Entry Requirements

Students are required to have met the Sixth form's A Level entry requirements (five 4-9 including English and Maths.)

A Grade 4 GCSE in Art or another creative subject would be beneficial but is not essential.

Students are expected to work with their own digital SLR camera.

For more information see [Miss Hodgson](#) Leader of Media & Photography

Physics

Examination Group: AQA

Students at Hedingham School follow the AQA Physics specification at A Level. This course has been designed to explain the universe from the very small sub-atomic quantum physics level, to understanding how all matter and energy in the universe behaves.

A Level Physics forms the basis for many other subjects including Chemistry and Biology, as well as being essential for courses such as Engineering and Astrophysics. Students will develop skills in problem solving and quantitative reasoning that opens the door into working areas far beyond the scope of Physics itself.

Year 12 content

Unit 1: Measurements and their errors

Unit 2: Particles and radiation

Unit 3: Waves mechanics

Unit 4: Materials

Unit 5: Electricity

Year 13 content

Unit 6: Further mechanics

Unit 7: Thermal physics

Unit 8: Fields and their consequences

Unit 9: Nuclear physics

Optional Unit

Option 1: Astrophysics

Option 2: Medical physics

Option 3: Engineering physics

Option 4: Turning points in physics

Option 5: Electronics

Assessment

100% Examination at end of Year 2

Paper 1: Particles, Waves, Mechanics, Electricity

(85 marks, 2 hours)

Paper 2: Thermal physics, Fields, Nuclear Physics

(85 marks, 2 hours)

Paper 3: Practical Component, Optional Component

(85 marks, 2 hours)

All papers contain long or short answer questions, alongside a multiple choice section for both Papers 1 and 2. Paper 3 covers practical skills and data analysis alongside questions from the optional unit covered.

Science Practical Endorsement, students are internally assessed by teachers to ensure that they continue to develop their core practical skills

supporting the theory discussed in lessons and develop their practical skills in preparation for University level experiments.

Pathways/Careers/University courses

Physics is a challenging subject utilising strong Mathematical reasoning, it complements subjects such as Mathematics, Biology, Chemistry, Geography and Computer Science. Taking the Mathematics A Level is not required, but is actively encouraged as both subjects support one another in their understanding.

Students who are successful in Physics are enabled to follow University courses or careers in Science, as well as more diverse areas such as Medicine, Law, Finance and Journalism.

Entry Requirements

Students will need a Grade 6 at GCSE Physics or 6-6 in Combined Science, Grade 7 in Maths and four other grades 4-9 subjects (including English).

For more information see [Dr Finn Leader of the Science](#)

Politics Examination Group: Edexcel

Politics means everything around us today.

Every law that is passed.

What an individual prioritises and stands for.

Every decision to a nationwide crisis.

Every school, hospital, almost every outcome has been influenced by it.

The subject takes a practical understanding and analysis of UK and US Politics as well as Political ideologies. It should be a serious consideration for those who are good at written communication. It requires you to develop knowledge, analysis and have a justified opinion (evaluation).

Year 12 content

Paper 1: Introduction, UK Political Parties, UK Democracy, Electoral Systems, Elections and the Media

Paper 2: UK Constitution, Parliament, Executive, Supreme Court and sovereignty

Paper 3: Conservatism, Liberalism, Socialism

Paper 4: Nationalism, Feminism

Year 13 content

Paper 3: US Constitution, US Congress, US Presidency, US Democracy, US Supreme Court

Assessment

100% examination at end of Year 2

Paper 1: UK Politics and core ideologies

Paper 2: UK Governance and non-core ideologies

Paper 3: US and Comparative

Pathways/Careers/ University courses

Every year several students go on to take Politics or International Relations in some area of study, despite not necessarily intending to do so at the start of the year.

You could be thinking about careers in Law/ Barrister, Media and Communications, Leadership, Diplomacy and Foreign Relations abroad, Public Relations, Civil Service/ Government Departments (Finance, Education, Health, Defence, Crime and Punishment, Housing, Culture, Media, Sport, Transport), Activist, Campaigner, Analyst or Researcher

Entry Requirements

Students must have met the School's entry requirements. A Grade 5 in English is preferable.

For more information see [Mr Wadsworth Leader of Politics](#)

Psychology

Examination Group: AQA

Psychology is the study of the mind, questioning how the brain dictates and influences our behaviour through conscious and unconscious processes such as communication, memory, thought and emotion.

The Psychology A-Level is underpinned by the nature vs nurture debate – do we behave as we do because of how we were born, or due to the impact of the range of experiences throughout our life? The course content is wide-ranging, covering eight distinct but closely related topics. In addition, research methods (the critical assessment of the processes underpinning psychological studies and conclusions), issues and debates (including free will v determinism, nature v nurture and the ethic of animal research), and approaches (key theories that underpin key research across a range of topics) are integrated throughout the two-year course.

Years 12 content

Unit 1; Social influence: how other people influence our behaviour, why we conform to societal expectations or obey those with authority, and, in contrast, the processes leading to social change.

Unit 2; Attachment: how we form early relationships,

the extent to which this is natural or learnt, and the impact this has on our future development both through childhood and later life.

Unit 3; Memory: the study of how and what we remember, the difference between short- and long-term memory and an exploration of what can impact our memory or explain situations in which we forget, and how this can be overcome to support the criminal justice system.

Unit 4; Psychopathology: definitions of abnormal behaviour and how these originate, what causes certain individuals to behave in this way and how it can be treated.

Years 13 content

Unit 5; Biopsychology: the physiological processes that influence our behaviour including the nervous system, the structure and function of neurons and the fight or flight response.

Unit 6; Aggression: comparing and contrasting different explanations of aggression and applying theory to help explain real-life situations.

Unit 7; Stress: the causes of stress, the type of people more or less likely to be impacted by stress and mechanisms to overcome or deal with stressful situations.

Unit 8; Gender: the difference between sex and gender and the individual and societal influences which define our gender identity.

Assessment

100% examination at end of Year 2

Paper 1: Introductory topics in psychology

Paper 2: Psychology in context

Paper 3: Issues and options in psychology

Pathways/Careers/University courses

Psychology supports students to adopt an inquiring mind, develop the ability to use scientific research to support and challenge their understanding of human behaviour, and tackle real-world themes, questions and ideas pertinent to their lives. Psychology is relevant to many University degrees or potential future careers, especially those involving interactions with others. Psychology prepares students for employment in a variety of areas including mental health, human resources, education, research and law.

Entry Requirements

Five 4-9 GCSEs including English and Maths. A Science GCSE at grade 5 or above is preferred.

For more information see [Mr Sadler](#) [Leader of Social Sciences](#)

Sociology

Examination Group: OCR

Sociology is the study of human society, exploring its impact on group and individual behaviour, social relationships and interactions, and the cultures and identities associated with everyday life.

A-Level Sociology provides an exciting opportunity to gain a deeper understanding of the world around us, to reflect on social issues and the changing nature of the modern world, and to think about your own social experiences and what has caused them. The course includes three core components or papers, each of which provides the content for an externally assessed written exam.

Years 12 content

Unit 1; Socialisation, culture and identity: encourages students to explore who they are as individuals, which groups they belong to and what this means, and how they came to understand or learn what these groups represent. Six aspects – nationality and ethnicity, gender, social class, sexuality, disability and age – are used to understand the different elements of an individual's identity, how these interact, and how they change across time and place. The role of the media as an agent of socialisation is studied in

depth, considering a range of evidence of how different groups are represented in the media, and the role of audiences in managing media effect.

Unit 2; Research methods and researching social

inequalities: introduces students to the research methods used to draw sociological conclusions, such as questionnaires, interviews and media content analysis, identifying, through practical application, the strengths and limitations of each. Students will also develop their knowledge of patterns and trends of social inequality, and how different factors – social class, age, gender, and ethnicity – impact your opportunities in all areas of social life.

Years 13 content

Unit 3; Debates in contemporary society: focuses on two areas – globalisation and the digital social world and education – that root our curriculum firmly in real-life experiences that are relevant and relatable to our learners. Students combine what they already know with key theoretical perspectives and a range of national and international case studies to critically assess each topic in the context of recent and historical developments.

Assessment

100% examination at end of Year 2

Paper 1: Socialisation, culture and identity

Paper 2: Researching and understanding social inequalities

Paper 3: Debates in contemporary society

Pathways/Careers/ University courses

Sociology students are equipped to understand, explain and question the world around them, and are taught to write fluently, consider evidence from different perspectives and draw thoughtful, meaningful conclusions. As a result, Sociology is fantastic preparation for a wide range of University study and the department has established links with the Social Sciences faculty at the University of Essex. Similarly, Sociology can lead to careers such as journalism, public relations or within the charitable sector, or more specialised roles in health, the criminal justice system or law.

Entry Requirements

Five 4-9 GCSEs including (preferably) a grade 5 or above in English.

For more information see **Mr Sadler**
Leader of Social Sciences

T LEVEL COURSE

Digital Business Services

The NEW T-Level in Digital Business Services is a full time (equivalent to 3 x A-Levels) course which combines subject knowledge and skills from multiple subjects including Business Studies, Information Technology, Computing and Digital Media. If you want to learn how to become an integral part of any Business by being able to provide suggestions on how to capitalise and maximise on patterns and trends and present this information to clients in an exciting and engaging way, then this could be the course for you.

The T-Level Digital Business Services course is a brand-new state of the art qualification that helps you grow and develop into someone with the key skills and specialist knowledge which businesses are keen to employ. The course has been specially designed alongside businesses to ensure you have the right skills to succeed. The course, delivered inside our brand-new state of the art T-Level Building (a.k.a "The Tech Hub") combines a mix of theoretical knowledge and practical skills development across a range of software applications. As part of your study, you will complete practical project-based work that matches the ways in which real businesses work on a day to day basis. You will learn about data

management, project development, digital analysis, digital learning platforms and lots more!

To support you in your learning you will also take part in an industry placement lasting 315 hours (roughly 9 weeks) over the course of 2 years. This industry placement will teach you on the job skills required to work in a business or technology related environment. You will work closely with your employer on a range of tasks and projects and will apply the skills you learn during this period back into your class activities. We work collaboratively with employers to get you the most out of this experience. We ensure that content covered in lessons helps to support you on the job experience and employers adjust the tasks and activities of your work placement to help support your theoretical knowledge. This helps you to meet the needs of the business whilst continuing to develop your work skills.

Study of the Digital Business Services course provides a natural bridge into employment in the field of data analysis where you would likely be involved in projects covering the use and creation of the systems involved in strategic planning, management

(including staff, payroll, finance) and marketing.

Entry Requirements

Five Grade 4's or above at GCSE (including English and Maths). Subject knowledge of Business Studies, Information Technology or Computer Science is not required, but would be beneficial.

Next steps

A T-Level carries the same UCAS points as 3 A-Level courses. This could lead to study of a degree course at University (eg IT Management for Business (BSc), Interactive Technologies (BA), Digital Technology Solutions (BSc)) or into other routes such as Apprenticeship Degrees (eg Digital Marketer (BSc), Digital and Technology Solutions (BSc)) or directly into employment as an IT practitioner (eg Systems Administrator, Network Technicians) both locally or globally.

Assessment

During the course you will be expected to complete 4 main forms of assessment. These are split over the 2 years. In Year 12 you would complete 2 written exam papers (each 2 hours long) which cover the theory content you have studied and a 15-hour employer set project, these make up 50% of your overall qualification. In Year 13 you would complete a 29-hour synoptic assignment which draws upon knowledge and skills from your 2-years of study which makes up the other 50% of your overall course grade.

Interested? Ask for one of our in-depth T-Level Digital Business Services packs today.

BTEC &
CAMBRIDGE
TECHNICAL
COURSES

Applied Science Level 3 Cambridge Technical Extended Certificate

Examination Group: OCR

This course will equip you with the skills to pursue a career in a scientific field or go on to further study. It is an opportunity to develop professional skills through carrying out real experiments and research.

Students gain an understanding of the different types of scientific industries and settings plus how laboratory design can vary across organisations and sectors.

Year 12 content

Unit 1: Science fundamentals

This unit creates a solid foundation for all the other units covered.

Unit 2: Laboratory technique

This includes lots of the skills required by technicians working in any kind of scientific laboratory, including working for an industrial company, the NHS, contract analysis of environmental samples and working in science education.

Year 13 content

Unit 3: Controls of hazards in the laboratory

This unit covers an overview of the most common hazards encountered in typical research labs.

Unit 4: Microbiology

This develops a range of practical manipulative skills that enable safe work in a microbiology laboratory.

Unit 5: Product testing techniques

This unit looks at how consumer products are rigorously tested and regulated before being allowed to be sold and after sales.

Assessment

Unit 1 and Unit 2 are externally assessed through formal exams, this will include case studies related to the science sector.

Units 3, 4, and 5 are assessed through controlled assessments that look at applying and evidencing theory through practical means.

Pathways/Careers/ University courses

This Level 3 qualification is the equivalent to an A level and can be

used for applications to Higher Education or for employment within scientific fields.

Some students who gain the level 3 Cambridge Technical in Applied Science may wish to enter a specialist area of employment within the science industry or within organisations that use science in positions such as: Quality control technician/analyst, medical physics technicians, research lab work, forensic science service, chemical industry, or scientific journalism. Other areas students are suited for include: Biological Science, Forensic Science, Molecular Biology, Nursing, Sports Science, Medical Technology, Midwifery, Paramedic, Biophysics, Food Technology.

Entry Requirements

5 GCSEs (4-9) including English and Maths. Students will require a 4-4 or above at GCSE Combined Science or 4 or above in each Biology, Chemistry and Physics triple exams.

For more information see [Mr Sanders](#) [Key Stage 5 Science Co-ordinator](#)

Business Level 3 Cambridge Technical Extended Certificate

Examination Group: OCR

A CTEC in Business is a more vocational option to the A Level in Business and would suit learners who prefer to work in smaller, more focussed chunks.

The level 3 Cambridge Technical is equivalent to one A-level and will provide you the opportunity to develop core skills and understanding of the requirements of the business sector. You will gain hands-on experience and have the opportunity to focus on specific topics such as human resources, marketing and business planning. This offers learners a vocational alternative to the more academic A Level course.

Year 12 content

Unit 1: The business environment (*Written exam*)

Understand different types of businesses and their objectives.

Understand how the functional areas of businesses work together to support the activities of businesses.

Understand the effect of different organisational structures on how businesses operate.

Be able to use financial information to check the financial health of businesses.

Understand the relationship between businesses and stakeholders.

Understand the external influences and constraints on businesses and how businesses could respond. Understand why businesses plan.

Be able to assess the performance of businesses to inform future business activities

Unit 2: Working in Business (*Written exam*)

Understand protocols to be followed when working in business.

Understand factors that influence the arrangement

of business meetings. Be able to use business documents.

Be able to prioritise business tasks.

Understand how to communicate effectively with stakeholders.

Unit 3: Customers and communication (*Coursework*)

Understand who customers are and their importance to businesses.

Understand how to communicate with customers learning outcome.

Be able to establish a rapport with customers through non-verbal and verbal communication skills. Be able to convey messages for business purposes.

Know the constraints and issues which affect the sharing, storing and use of information for business communications.

CONTINUED ON NEXT PAGE

Year 13 content

Unit 4: Marketing and market research (Coursework)

Understand the role of marketing in businesses. Know the constraints on marketing.

Be able to carry out market research for business opportunities.

Be able to validate and present market research findings.

Unit 5: Business events (Coursework)

Be able to prepare for a business event.

Be able to support the running of a business event.

Be able to review and evaluate if the business event met its objectives.

Assessment

2/3 Exam 1/3 Coursework

Pathways/Careers/ University courses

Whatever direction you choose to take your career path in the future, you will either be employed or an employer and this course will provide you with valuable insights into how your business (or the one for which you work) operates and, importantly, satisfies its customers. As such it is ideal for students looking at entering employment or apprenticeships straight away but also gives a route

into further study of business studies at university or college.

This qualification can also be taken as a **standalone one-year enrichment course** resulting in a Certificate in Business being awarded (equivalent to one AS level)

To achieve the certificate level you would need to complete units 1,2 & 3 only.

Entry Requirements

Students are required to have met the Sixth Form's entry requirements. A GCSE Grade 4 or above in Business Studies would be beneficial but is not required.

Business Level 3 can be taken as a one year Enrichment course

For more information see [Mr Illingworth](#)
[Leader of Business](#)
or [Mr Nolan](#)

Criminology Diploma

Examination Group: WJEC

During Year 1 you will study for the Certificate, for Year 2 you will progress to the Diploma (equivalent of 1 A Level)

Criminology is a qualification which includes elements of Psychology, Law and Sociology. The course aims to develop knowledge and understanding of the criminal justice system and an awareness of the different types of crime as well as exploring the behaviour and theories behind why people commit crime.

Year 12 content

Unit 1: Changing Awareness of Crime: This unit focuses on building your understanding of the different types of crime and the things that influence the way we perceive crime. We will also examine the reasons why certain types of crimes are less likely to be reported to the police.

Unit 2: Criminological

Theories: We will look at how we define crime and what constitutes criminal behaviour. We will also look at the fundamental question of why people commit crime, drawing on biological, psychological and sociological theories. We will then examine how these theories may have influenced social policy in relation to crime.

Year 13 content

Unit 3: Crime Scene to

Courtroom: This unit will enable you to develop your understanding of the criminal justice system from the moment a crime has been identified to the verdict in the courtroom. We will look at the complex processes involved in investigating and prosecuting crimes, and we will review real criminal cases to evaluate the evidence and the validity of the verdict.

Unit 4: Crime and Punishment

Using the knowledge and understanding gained from units already studied we will address questions such as: Why do most of us tend to obey the law even when to do so is against our own interests?

What institutions have we developed to ensure that people do obey laws?

What happens to those who break the law?

Why do we punish people?

How do we punish people?

How effective is the criminal justice system in preventing and dealing with criminality?

Assessment

The course is assessed using a combination of examinations and controlled assessments. You will sit one controlled assessment and one exam in your first year. There will be a second controlled assessment and one exam in your second year. The controlled assessments will take place part way through the year, and the exams will be in the summer.

Pathways/Careers/ University courses

This subject provides a valuable first step for university courses in Criminology, Sociology, Psychology, Political Science, Law or other subjects. In terms of careers, it can assist students in progressing onto multiple professions, within local government, the probation service, civil service, forensic psychology and the police force, to name a few

Entry Requirements

Five GCSEs at Grade A-C (9-4), including maths and English.

Criminology can be taken as a one year Enrichment course

For more information see [Mr Sadler](#) Leader of Social Sciences

Children's Play, Learning and Development BTEC Level 3 National Extended Certificate

Examination Group: Pearson

The early years sector in England is made up of over 80,000 settings, with 1.3 million childcare places for children under five. This ranges from childminders and nannies, to nurseries, crèches and preschools. This course gives students an insight into working with children in a range of different settings. It enables students to gain an understanding of the Early Years Foundation Stage Statutory Framework and how this is applied in different settings.

Year 12 content

Unit 1: Children's

Development: You will learn about theories and models of development that explain how and why children develop and how this relates to the EYFS. You will understand a range of factors that may influence children's development.

Section A: Scenario-based questions which will assess your ability to apply theory to practical real-life situations.

Section B: Long-answer questions that assesses your ability to analyse and interpret theories, how they relate to other areas of development and their impact.

Unit 5: Keeping Children

Safe: You will learn about the legislation, regulations and guidance relating to health, safety and child protection. You will examine how early year's professionals safeguard the children in their care and respond to any concerns.

Year 13 content

Unit 2: Communication

and Numeracy: Children's development of speech, communication, language, literacy and numeracy skills is an essential part of early childhood development. You will learn the sequence of this development and plan appropriate activities to encourage development.

Unit 3: Play and Learning:

You will learn about the types of play and the opportunities that should be made available to children at different ages and stages of development.

Assessment

Unit 1: Exam: 1 hour and 45 minutes (90 marks)

January and June with the opportunity to re-sit

Unit 2: Task set and marked by Pearson, completed under supervised conditions

Section A: students will be given a case study two

days before to carry out research.

Section B: the supervised assessment is carried out in 3 hours timetabled by Pearson (68 marks). January and June

Unit 3: Coursework internally marked

Unit 4: Coursework internally marked

Pathways/Careers/ University courses

This course would suit anyone planning a career in child care, child services or teaching. Further study options include Child Psychology, Child Development and Learning, Early Child Education.

Entry Requirements

Students are required to have met the Sixth Form's entry requirements. All students will be expected to carry out 50 hours of work experience. This qualification will support anyone wanting to work with children whether this be in a nursery or pre-school setting, or who want to take this qualification further and work in the social care or teaching sector.

For more information see [Mr Batch](#) [Leader of Vocational Education](#)

Level 3 Cambridge Technical Extended Certificate in Digital Media

Examination Group: OCR

The Digital Media course is a more vocational option to the A Level in Media Studies and would suit learners who prefer to work in smaller, more focussed chunks.

The level 3 Cambridge Technical is equivalent to one A-level and will provide you the opportunity to develop core specialist knowledge, as well as the practical skills, to succeed in the media industry.

Year 12 content

Unit 1: Media Products & Audiences

(Written exam - January)

This unit develops an understanding of how producers create products that will appeal to an intended audience. You will look at different ownership models and how products are advertised & distributed whilst considering legal, ethical and regulatory issues.

Unit 2: Pre-Production & Planning

(Written exam - June)

You will learn how to research and plan a media project whilst considering the constraints that they have to be made within including timescales, financial limitations and legal issues.

Unit 3: Create a Media Product

(Coursework)

You will research, plan, produce and edit original content for your intended product. This project can be completed in a variety of mediums such as audio-visual, audio or print.

Year 13 content

Unit 4: Social Media & Globalisation

(Written exam)

By completing this unit you will understand the ways in which online technologies and social media products have created a globalised, connected society and how such tools are used by media producers. As part of this you will evaluate the positive and negative impacts of social media on businesses and individuals. As part of this exam you will plan and create your own online social media advertising campaign

Unit 5: Advertising Media

(Coursework)

You will plan an advertising campaign for a product or service, selecting the appropriate media components to produce it. You will then create original media components for incorporating into a campaign, considering the market and its target audience, as well as legal and ethical constraints.

Assessment

2/3 Exam

1/3 Coursework

Pathways/Careers/ University courses

Recent figures suggest that 1 in 11 UK jobs are related to the creative industries. Those who study Digital Media will be equipped to obtain employment within these industries, opening the doors to a number of different career paths, ranging from the Film & TV industry, to marketing, social media and video games development.

This qualification can also be taken as a **standalone one-year enrichment course** resulting in a Certificate in Digital Media being awarded (*equivalent to one AS level*). To achieve the certificate level you would need to complete units 1, 2 & 3 only

Entry Requirements

Students are required to have met the Sixth Form's entry requirements. A GCSE in Media Studies would be beneficial but is not required.

Digital Media can be taken as a one year Enrichment course

For more information see [Miss Hodgson Leader of Media & Photography](#)

Performing Arts BTEC Level 3 National Extended Certificate

Examination Group: Edexcel

The course focuses on the development of students skills as Musical Theatre Performers. It develops students' vocal and physical skills through workshops in movement, dance, acting and singing. The BTEC Level 3 Extended Certificate in Performance is a two-year vocational qualification equivalent to one A Level. This qualification will suit those students who are interested in learning about the performing arts sector, those who would like to pursue a career in performing arts, and those who would enjoy a creative and practical subject to balance their A-Level curriculum. The course is suitable for students who have studied a performing arts course as part of their GCSEs and/or those who have experience of performing arts classes outside of school.

Years 12 content

Unit 34: Developing Skills and Techniques for Performance:

Students will develop knowledge of the roles and skills of a musical theatre performer by exploring topics such as; training and qualification routes, working conditions and lifestyle factors, and professional development and career opportunities in the Arts Practical study in this unit requires students to develop appropriate skills & techniques in a performing arts discipline(s). Students

will participate in regular workshops, classes and exercises to develop the necessary technical, practical and interpretive performance skills to help succeed when performing in front of a live audience. Students will take part in two live performances in different styles/disciplines, which they will then review and evaluate.

Unit 27: Musical Theatre Techniques:

Students will explore musical theatre as a performance style, looking at the history and development of musical theatre and studying a variety of West End and Broadway Musicals.

Through practical workshops they will develop the skills to be a musical theatre performer. Students will be expected to participate in technique classes, rehearsals and a final group musical theatre performance.

Years 13 content

Two Optional Units:

The final two units are optional and will be chosen according to student interest and strengths within the class. These include:

Acting Styles
Developing the Voice for Performance
Tap Dance, Jazz Dance
Street Dance
Contemporary Dance
Choreography Live Performance
Singing Techniques for Performance.

Unit 3: Group Performance:

Students are expected to respond to a given stimulus as part of a group (*set by the exam board*), using research, discussion and practical exploration to develop & create performance material lasting 10 – 20 minutes to a live audience. Students will be able to pick one or more of the disciplines, dance, acting, musical theatre to work in.

Assessment

Assessment is conducted through the two-year programme. Four units are internally assessed through coursework. Coursework includes live performances, practical workshop videos and written portfolios. The final unit is externally assessed by the exam board through a video performance and a written reflection logbook.

Pathways/Careers/ University courses

The course provides students with an excellent foundation of knowledge and practical skills which will prepare them for further study of Dance, Drama or Musical Theatre at both university and performing arts vocational training colleges.

Entry Requirements

Students are required to have met the School's entry requirements.

For more information see
Mrs Murton
Leader of Dance & Drama

Sport BTEC Level 3 National Extended Certificate

Examination Group: Pearson Edexcel

This BTEC Level 3 course prepares learners for potential employment within the sport and recreation sector. The qualification gives learners the opportunity to develop a range of techniques, personal skills and attributes essential for successful performance in working life.

The BTEC course will give you a well-rounded education in the Sports Industry. Giving you detailed knowledge of various pathways within the Industry. This course would be well suited for individuals looking to further their sporting knowledge in pursuit of a career in in the Sports industry.

Year 12 content

Unit 1; Principles of Anatomy and Physiology in Sport:

(1hour 30 min exam)

The aim of this unit is to explore the structure and function of the skeletal, muscular, cardiovascular and respiratory systems and also to learn the fundamentals of the energy systems. On completion of this unit a learner should:

Know the structure and function of the skeletal system.
Know the structure and function of the muscular system.

Know the structure and function of the muscular system of the the cardiovascular system.

Know the structure and function of the respiratory system.

Know the different types of energy systems.

Unit 2; Fitness Training and Programming:

(externally graded)

The aim of this unit is for learners to be able to plan a fitness training sessions and design fitness training programmes. It gives the learners an opportunity to explore the body's response to acute exercise and how the body adapts to long-term exercise participation. On completion of this unit a learner should:

Know different methods of fitness training.

Be able to plan a fitness training session.

Be able to plan a fitness training programme.

Be able to review a fitness training programme.

Year 13 content

Unit 3; Professional Development in the Sports:

(internally assessed)

The aim of this unit is to explore the knowledge and skills required for different career pathways in the sports industry. Learners will take part in, and reflect on, a personal skills audit, career action plan and practical interview assessment activities.

In this unit learners will:

Understand the career and job opportunities in the sports industry
Explore own skills using a skills audit to inform a career development action plan.
Undertake a recruitment activity to demonstrate

the processes that can lead to a successful job offer in a selected career pathway
Reflect on the recruitment and selection process and your individual performance.

Unit 4;

Plus, one optional unit:

Sports leadership
Practical sport
Sports Psychology
Fitness Testing

Assessment

One exam unit; 1hour 30 mins. One externally moderated synoptic unit; A set task from the exam board
Two internally assessed units

Pathways/Careers/ University courses

This BTEC qualification in Sport introduces the sector for learners looking to build a career in sport, within one of its many occupational areas, including careers in exercise and fitness, coaching and leadership and sports development.

Entry Requirements

Students are required to have met the School's

entry requirements.

HEDINGHAM
SCHOOL
PE Department

YOOGA
MADE FOR RUGBY
PHILADELPHIA

BTEC
LEVELS 1 & 2
COURSES

Introduction in Construction

Level 1 Certificate

Examination Group: Pearson

This qualification is for candidates wishing to gain understanding and practical experience of the variety of trades in the Construction industry.

Content

Being Organised

Learners will develop key techniques to help organise their work and priorities and manage their time effectively. The skills you learn in this unit are key for progression to the next stage in your education. They are also crucial for work and life.

Developing a Personal Progression Plan

Learners will develop the skills and behaviours needed to progress to the next stage in their learning, identifying progression opportunities and creating a plan to enable them to get there. The skills you develop in this unit will be good preparation when applying for another course or training programme.

Building a Simple Wall

Learners will develop the skills needed for building a simple brick wall using construction methods and different materials. You will develop skills to prepare and construct simple walls safely. You will find out about the tools and materials that are used in wall building. You will learn about the methods that make sure the wall is strong enough to remain standing and you will develop your skills in pointing so that your wall is neat and attractive.

Fixing a Water Pipe

Learners will develop the skills needed to carry out plumbing operations, including cutting, bending and jointing to fix a water pipe. You will develop the skills needed to use the tools and equipment to fix a water pipe. You will learn about the best materials to use and learn how to cut, bend and join copper and PVC pipes. All of this will help you to construct a pipe rig, develop your plumbing skills and manage information.

Making Carpentry Joints

Learners will develop the skills needed to work with timber to produce a simple wooden frame using joints and basic woodworking and joinery skills. You will find out how to read from a drawing, measure out

timber and mark cuts.

You will learn how to use the correct tools and equipment to make a wooden frame. You will develop the skills needed to join the pieces of timber together by making joints.

Assessment

All units are assessed through practical and written coursework assignments.

Pathways/Careers/University courses

The primary aim of this qualification is to help prepare you to progress into further learning and training in the construction sector.

Entry Requirements

Students are required to have achieved five Grade 9-1 at GCSE Level.

For more information see

[Mr Batch](#)
[Leader of Vocational Education](#)

Workskills Level 2 Certificate

Examination Group: Pearson

This qualification is for candidates wishing to gain understanding and practical experience of the variety of trades in the Construction industry.

Content

Developing Job Application Skills

Learners will consider suitable job opportunities that reflect their goals and match their skills. Learners will explore how to present themselves and their skills to potential employers in writing. They will also consider where to source suitable job opportunities and complete relevant documentation to present themselves, their skills and experience to employers.

Developing Interview Skills

Learners will examine the various assessment methods involved in the interviewing process and to determine how they can ensure they are prepared for different types of assessment including interviews.

Understanding Work-based Rights and Responsibilities

Learners will develop an understanding of the rights they have as an employee and the responsibilities employers have towards their employees. They will also develop an understanding of their own responsibilities in the workplace and how to apply these to situations they may find themselves in at work.

Working as Part of a Team

Learners will work together towards achieving a common work-related outcome. They will need to understand your role in the team, the roles of others and work together utilising each member of the team's skills effectively. At the end of the task they will review their own and the team's performance.

Anticipating and Meeting Customer Needs and Expectations

Learners will explore the skills needed to work with customers and demonstrate how to deal with customer service issues. They will identify customer needs and expectations and explore how to deal with them effectively. They will identify key customer service issues including complaints and problems and determine appropriate solutions.

Being Entrepreneurial

Learners will be given the opportunity to find out what is involved in becoming an entrepreneur. They will consider what is needed to conduct a successful enterprise activity and carry it out. They will keep accurate records, recording the profit or loss of the enterprise activity. They will also develop an understanding of how to increase the chances of success of an enterprise activity and how to evaluate its performance.

Assessment

All units are assessed through practical and written coursework assignments.

Pathways/Careers/University courses

The primary aim of this qualification is to help prepare you to progress into further learning and training in the construction sector.

Entry Requirements

Students are required to have achieved five Grade 9-1 at GCSE Level.

For more information see [Mr Batch](#) [Leader of Vocational Education](#)

ENRICHMENT COURSES

Community Sports Leadership Award

Examination Group: OCR

Students undertaking the qualification in Community Sports Leadership (CSL level 2) will learn and demonstrate important life skills such as effective communication and organisation whilst learning to lead basic physical activities to younger people, their peers within the community. The courses involve both guided and peer-to-peer learning and supervised leadership to ensure that learners have all the skills they need to lead basic physical activities to other people.

The sessions use sport to deliver fun and engaging physical activities with other students and within the community. Students will plan, lead and evaluate sports/physical activity sessions over a number of tutored hours and then demonstrate their leadership skills as part of their assessment.

Year 12 content

Unit 1

Students will have four lessons over a fortnight, with some of this time aimed at helping in lessons and, eventually, going in to primary schools to lead sporting events. To complete the course students will have to lead ten hours of coaching in a sport of their choice.

Assessment

Written Log of Leadership
10 hours community leadership
Teacher observations.

Pathways/Careers/University courses

What do students gain from this course?

Increased confidence
The ability to confidently lead others.

Valuable team-working skills
Improved communication skills.

The ability to plan, implement and review your own and others performance.

Improved social and academic confidence.

For more information see [Mr Sergeant Leader of PE](#)

Core Mathematics Examination Group: AQA

The course is a Level 3 course that is the equivalent of an AS qualification (carrying the same number of UCAS tariff points).

The Core Maths course follows a one-year specification. Core Maths has been designed to maintain and develop real-life maths skills. What you study is not purely theoretical or abstract; it can be applied on a day-to-day basis in work, study or life. The course focuses primarily on statistics and finance and their real-life application.

Year 12 content

Unit 1; Compulsory Component;

This unit includes topics such as, data collection, percentages and financial problems, along with the revision of various GCSE topics.

Unit 2; Optional Component:

This unit will be decided upon by the class teacher based on the students' strengths and areas of interest. Choices will be between Statistical techniques, Critical Path and Risk Analysis and Graphical Techniques.

Pathways/Careers/University courses

The skills developed in the study of Mathematics are increasingly important in the workplace and in higher education. Studying Core Maths will help you keep up these essential skills. In addition, with increasing Mathematical demands of numerous A Level courses, skills developed through this course should help students' access content explored in other subject areas, for example Science, Design and Technology, Business Studies, Psychology and Geography.

Assessment

Students will be assessed by two 1 ½ hour exams at the end of the course. Each exam is worth 50% of students' overall grade.

Exam 1: Compulsory Component

Exam 2: Optional Component

Entry Requirements

Students must have achieved a minimum of Grade 4 at GCSE Mathematics.

For more information see [Mrs Woodley](#)
[Leader of Mathematics](#)

Extended Project Qualification Examination Group: AQA

A fast-paced, one-year course that molds around your interests, hobbies or career prospects. Independence, organisation and creativity is key!

The course can be adapted to suit the needs, skills and knowledge of the individual to create a research project that acts like a mini-dissertation; employers and higher education love this! The Level 3 Extended Project Qualification is an opportunity for students to embark on a self-directed and self-motivated journey. Students will be asked to choose a topic, plan, research and develop an idea. The finished product may take the form of:

A research based written report (5000 words).

A production* (eg charity event, fashion show or sports event etc) An artefact* (eg piece of art, a computer game or realised design).

**a written report must accompany these options (1000 words)*

Students must also record their project process in the form of a Production Log. The process of recording and completing a project is, in fact, just as important than the finished product. Both the Production Log and the Product will be assessed.

Student will learn to:

Manage: identify, design, plan and completed a project whilst applying organisational skills and

strategies to meet the stated objectives.

Use resources/research:

Obtain and select information from a range of sources, analyse data, apply it relevantly and demonstrate understanding of any appropriate connections and complexities of the topic.

Develop and realise: Use of range of skills, including using new technologies, to solve problems, take decisions critically, creatively and flexibly and to achieve the projects aims.

Review: evaluate the outcome, including the learning and performance which will require honesty and careful consideration.

What could I do next with an EPQ? A Level 3 Extended Project Qualification is worth the equivalent of half an A Level. Therefore, the completion of the qualification can support the application or further education, apprenticeship and progression into a work place.

Year 12 content

Unit 1: Compulsory Component: Production Log; This unit is a working document that is

continuously adapted through the one-year course. It will show your skills in planning, research, development and execution.

Unit 2

Compulsory Component:

Essay; Alongside your production log, will be an essay outlining all the things you have found along the way.

Unit 3

Compulsory Component:

Artefact; Choosing to build/design/perform an artefact is your choice but should complement your research and essay by giving a physical representation of what you have found out.

Assessment

100% Coursework Production Log Essay Optional: Artefact

Pathways/Careers/ University courses

Universities are recognising the EPQ course more and more, with some even giving grants to those with high grades. This course is designed to develop confidence, organisation, communication, dedication and research skills that can be applied to higher education as well as career prospects.

Entry Requirements

Minimum of Grade 4 in English at GCSE.

For more information see [Miss Halls EPQ Coordinator](#)

Photography AS Level Examination Group: OCR

A course for anyone with a keen interest in photography and design. Students taking this course have the opportunity to study photography in detail. This will give students the chance to learn the practical and theoretical skills involved in this industry.

Year 12 content

Unit 1: Introduction to photography

This unit will cover the basics of photography as well as allowing you to explore different mediums such as portrait, landscape, still life etc. You will gain both creative and technical skills to take forward in your work.

Unit 2: Coursework portfolio

Your own personal exploration of a particular medium of photography.

Assessment

100% coursework portfolio.

Pathways/Careers/ University courses

This course will work well in combination with many subjects, including Art, Dance and Media. However, it would also

stand alone for students who have a particular interest in photography and wish to improve their skills while gaining a nationally recognised qualification.

Entry Requirements

Students are required to have met the Sixth form's A Level entry requirements (*five 4-9 including English and Maths.*)

A GCSE in Art or another creative subject would be beneficial but is not essential.

Students are expected to work with their own digital SLR camera.

For more information see [Miss Hodgson](#) Leader of Media & Photography

MATHEMATICS
AND ENGLISH
GCSE RESITS

GCSE English

Examination Group: AQA

For students who have not yet achieved a GCSE English grade 4, the English Learning Area will be offering the AQA English Language GCSE as a one year course with two exams in the summer term.

Assessment

Paper 1: Explorations in Creative Reading and Writing (50%).

Paper 2: Writers' Viewpoints and Perspectives. (50%)

For more information see

Ms Barker
Leader of English

GCSE Mathematics

Examination Group: Edexcel

For students who have not yet achieved a GCSE Mathematics grade 4 or above. Resit GCSE is offered as a one-year course, following the Linear Foundation specification with exams in the summer. With the possible option of an exam in November for those who only narrowly missed the Grade 4.

Assessment

Three written papers each 1 hour and 30 minutes in length. (One non-calculator and two calculator)

For more information see

Mrs Woodley
Leader of Mathematics

Attendance

In order for you to attain your full potential, attendance at all lessons for your chosen courses is compulsory. Year 12, 13 and 14 students must register each morning between 8.40-9.10 am in the Sixth Form area. They must also attend 1-1 mentoring by appointment with their personal tutor. We expect you to read your school email daily. It

is compulsory for students to attend all personal tutor sessions. Their attendance counts towards the minimum 90% requirement. Failure to attend above an average of 90% of your lessons will lead to a progress meeting.

To maximise your potential as a Sixth Form student you are also encouraged to stay in school all day

to make the best use of your personal study time. Teachers may ask to meet with you during this time. Year 12, 13 and 14 students may go home after their last lesson of the day. If you are leaving the school site during the school day it is compulsory to sign out at the Sixth Form office. This allows us to have correct information for fire drill procedures.

Absence

If you are ill or for any other reason unable to get to the school, the school must be notified by telephone on the morning of the absence. Year 12 parents must telephone the school. In Year 13 students can telephone the school before 9.00 am. If there is an absence of five days or more, then this should be supported by a doctor's

certificate. For planned absence eg hospital appointment, university visit, funeral, driving test etc, you should fill in an absence form prior to the event. You can get these from the Sixth Form Office.

Students should not plan driving lessons or routine doctor's appointments during the school day.

Parents of students who are not present at school and have not completed a form prior to their absence or telephoned in will be texted on the morning of the day they are not in school to check the reason for absence.

Students who arrive late to school must sign in at the Sixth Form Office.

Learners' Code

Hedingham Sixth Form has very high expectations of all learners. Students will need to show that they are capable, polite, co-operative and independent learners. They will have to work hard to

keep their place on their chosen courses here by performing to expectations, working at or above their target grades, achieving well in all exams, keeping up attendance and behaving appropriately at

all time. Hedingham Sixth Form's policy on behaviour and performance expectations has been put into place to support student's learning and to enable them to achieve their goals.

Dress Code

Students are expected to wear clothes suitable for a learning environment and remember that they are role models for younger students.

T-shirts with any wording that may be considered offensive are not appropriate. Students should

also not wear clothing in the summer that exposes large areas of flesh. Skirts and shorts, if worn, should be no shorter than just above the knee. Flip flops should not be worn to school due to health and safety issues. Students should be aware that only natural hair colours

and minimal piercings are acceptable.

Sixth Form students are also not allowed to wear hoods or hats anywhere on the school site. Students must also wear their photo ID badge at all times on school site.

Careers

The Sixth Form participates in the Higher Education Conference in June each year at one of the local universities and has a programme of guidance for university entrance.

They also have access to a Personal tutor. In the Summer Term for Year 12 students there is a business Enterprise week which prepared students for the world of work. We provide

advice and guidance on possible 'next steps' whether that is higher education, apprenticeships or employment.

Employment

We understand that many Year 12, 13 and 14 students have paid employment for a number of hours each week. It is important that this is always out of school time and we recommend that 8 hours should be the

maximum length of time spent in paid employment per week. Additional hours will have a detrimental effect on a student's ability to study effectively. Students are not allowed to undertake paid work

during the school day and it is recommended that they think carefully about afternoon and evening work as post-16 courses are very demanding.

Bullying

We pride ourselves in being a caring Sixth Form in which students are keen to work, and bullying is rare. Nevertheless, we acknowledge that incidents of bullying can occur. The Anti-Bullying Policy was devised by

students and staff. It lays out how we attempt to build an ethos which is positive about individual differences between people and which deters bullying. It makes it clear that bullying is unacceptable, and finds

ways of supporting the victim, and guiding the bully into more socially acceptable ways. In addition, Sixth Form students offer active listening to support any younger student who needs to talk.

Child Protection

All staff at Hedingham School are committed to protect and safeguard the welfare of all students within the school. Our aim is to create an environment where all students feel safe, accepted and trusted.

Students will know that there are adults within the school who they can approach if they are worried or in difficulty. There are activities and opportunities included in the curriculum which equip students with the skills

they need to stay safe from abuse.

All actions follow the Essex Safeguarding Children Board Guidelines and recommended Essex Child Protection procedures.

Students with a Disability

The school is committed to inclusion to prevent disabled students being treated less favourably than other pupils and aims to be an accessible place for all people, whatever their age, ability, race, culture or gender. Arrangements for

the admission of students with disabilities begins prior to them joining the school. The school's Special Needs coordinator works with families, and outside agencies to determine the student's needs and implications for the school's

provision for inclusion. The school has implemented its accessibility plan and now has a fully accessible site. This has included providing wheelchair access to the sports hall, Vocational Education Unit, a wetroom and a new lift.

E-Safety

The school is passionate about the use of technology. However, with every technological advance new risks are presented as well as

opportunities. The aim is to maintain an environment that harnesses technology but also ensures students remain safe by detailing the acceptable use of the

internet, recording devices and mobile phones. The policy identifies what is an E-Safety incident and the procedures the school will follow.

Learning and Teaching

The Learning and Teaching Policy is central in providing direction for the learning that takes place in the classroom. It aims to:

Provide a structure for learning that can be understood by students to promote greater consistency in planning and organising lessons.

Encourage students to take more responsibility for their learning.

Enable staff to use a wider range of teaching strategies.

Teaching staff are expected to use a range of styles of learning. These include discussion work, group work, thinking skills,

writing, role play, and ICT for non-specialists. An important development for all teachers is to integrate the personal, learning and thinking skills into the programme of study. Learning and teaching is monitored rigorously in the school self evaluation programme. All teachers are observed as part of the reviews

Learning Support and Special Needs

All members of staff have a responsibility to meet students' special educational needs. The Leader of Learning Support leads and co-ordinates support for students. The Leader of Learning Support

is supported by two HLTAs, one of whom has a literacy specialism. Students with SEND are fully integrated into normal classes. They are withdrawn when their individual education plan highlights a need for

small group or individual teaching. Many of these use ICT to support student learning. Learning Support staff are timetabled to support students in targeted lessons but most have a subject specialism.

Policies and Complaints

Parents wishing to see or acquire relevant curriculum or policy documents, or to discuss concerns in respect of the curriculum, are welcome to contact the Headteacher. It is hoped

that any other difficulties that arise may be resolved by contacting the school office who would arrange for an appropriate person to respond as soon as possible. In exceptional

cases a parent may wish to make a formal complaint. In this case they should do so in writing to;

*The Chair of Governors,
c/o the School.*

Race Equality

As a school, we are committed to the promotion of equal opportunity for all, including people from different racial, ethnic, cultural and religious backgrounds. In relation to race equality, the curriculum addresses two dimensions, the

development of intercultural awareness and education against racism. The school's PSHE and RE programmes explore the two dimensions with students.

We consider that all manifestations of racism are wholly unacceptable

and will act positively to eliminate racial discrimination where it occurs. We will take prompt, effective and systematic action to deal with the racist incidents and to identify and address racial, ethnic, cultural and religious inequalities.

Sex and Relationships Education

The Sex and Relationships Education Policy promotes open and honest discussion in mixed and single sex groups of young adults whenever possible. Outside speakers are used on topics where particular expertise and knowledge is considered beneficial.

Hedingham's Sex and Relationships Education Programme is designed to support and complement the teaching provided by parents in the home. Parents are welcome to contact the school for further information about topics and resources.

Parents have the right to withdraw their children from the elements of the Sex and Relationships Education Programme that are not part of the national curriculum. The policy may be viewed at the school on application.

General Information

Headteacher:	Mr Andrew Harvison
Deputy Headteacher:	Mr Paul Finch
Head of Sixth Form:	Mr Rory Hyde
Chair of Governors:	Mrs Sarah Ford
Vice Chair of Governors:	Mr Martin Lee

Term Dates 2023-2024

Autumn Term starts:	1 September 2023
<i>Half Term holiday:</i>	<i>23 - 27 October 2023</i>
Autumn Term ends:	20 December 2023
Spring Term starts:	4 January 2024
<i>Half Term holiday:</i>	<i>19 - 23 February 2024</i>
Spring Term ends:	28 March 2024
Summer Term starts:	15 April 2024
<i>Half Term holiday:</i>	<i>27 - 31 May 2024</i>
Summer Term ends:	23 July 2024

The School Day

Registration	8.40am
Period 1	9.10am
Period 2	10.10am
<i>Break</i>	<i>11.10am</i>
Period 3	11.30am
Period 4	12.30pm
<i>Lunch</i>	<i>1.30pm</i>
Period 5	2.15pm
Finish	3.15pm

Students who do not travel on school buses should normally arrive at 8.30 am. A late bus travels on Wednesdays at 4.45 pm for students who stay in school for extra-curricular activities. All schools are required by law to produce a Prospectus which contains

specific items of information. As well as giving the mandatory details, we have tried to provide the more wide-ranging information which parents and students need to have before they can make the important choice of the right Post-16 institution. We hope that

you find this Prospectus helpful. We try to establish, develop and maintain an open, responsive and supportive relationship with parents and carers. If you have further queries about the school after reading this Prospectus, please feel free to contact us.
