

Year 10 Emergency Closure Work

Maths

You have access to Sparx Maths, which is the online platform you complete your homework on. If you are behind on your compulsory homework which is set each week by your maths teacher you must firstly complete this.

When all homework is completed you will find additional tasks in the 'Target' and 'XP boost' sections on the platform. These tasks allow you to revise content that has been previously taught. The sections are specifically designed to further challenge your understanding of the topics already covered in class. You can select any tasks you would like to attempt in these sections.
